Summarized briefly the above tables show: Total admissions 1,806, males 1,056, females 750, total separations 1,416, males 876, females 540; net gain 390, males 180, females 210. The admissions were classified as follows: Court commitments 1,665, males 973, females 692; individuals charged with criminal actions admitted for observation as to their sanity 26, males 25, females 1; persons who entered the hospital voluntarily for care and treatment 114, males 57, females 57; and 1 male patient was admitted for temporary care. The separations were divided into the following groups: Discharges 620, males 380, females 240; deportations 13, males 10, females 3; transfers to other institutions 18 males; deaths while absent from the hospital 19, males 12, females 7; deaths in the hospital 746, males 456, females 290. Patients paroled were 1,142, males 591, females 551, while 607 were returned from parole, males 303, females 304. Patients who escaped 202, males 196, females 6, and those returned from escape 95, males 92, females 3.

The total number of admissions for the last fiscal year was the greatest for any twelve-month period in the history of the hospital. This was accounted for, however, by the increase in patients who entered voluntarily. Each year more people are admitted in this manner and if the statute governing this procedure were modified, a still greater number could enter without going through the rather distasteful and oftentimes harmful experience of court commitment. Escapes were also greater during the last fiscal year than ever before. The main factors in causing this increase were: First, the establishment of more "open" wards; second, granting freedom of the grounds to more patients; and third, the widespread employment of patients on various types of work projects located in many places on hospital property.

PUBLIC WORKS ADMINISTRATION PROJECTS

The two construction projects conducted under grant agreements with the Public Works Administration and started in the fall of 1938 were completed in November, 1940, at an approximate cost of \$2,300,000. During the course of the program 113 separate contracts were let and all expenditures were made in accordance with the rules and regulations of the Public Works Administration. Mr. George M. Bull, Regional Director, supervised the entire program and great credit must be given him and his staff for the efficient manner in which it was carried out and completed. The courteous cooperation and sound, practical advice furnished by Mr. Bull and his capable assistants will always be remembered with gratitude by the hospital management.

Not only were facilities for the care and treatment of nearly twelve hundred patients added to the hospital but also many needed improvements and replacements as well as major repair jobs were done under these projects. As a result of the increase in housing accommodations much of the overcrowding which had existed for so many years has been markedly relieved. The new construction included: Five two hundred bed dormitories at the

main institution, a general storehouse, a central kitchen, a cafeteria for employees, a modern hydrotherapy department, an isolation unit, additions to the building for tuberculous patients, and a building to house both employees and patients at the farm. Among the replacements, repairs and improvements were the following: Installation of automatic fire protection sprinkler systems in all buildings of non-fireproof construction which housed patients or employees, remodeling the central heating plant and the addition of two new high pressure boilers with the capacity of approximately 1200 horsepower each, replacement of obsolete heating systems in seven old buildings, installation of new steam mains and a hot water circulating system, extension of sewers, water mains, power lines and gas mains and improvements to grounds such as an outdoor lighting system, lawn sprinkling equipment, fencing, grading, oiling of roads, curbs and sidewalks.

WORKS PROJECTS ADMINISTRATION PROJECTS

Through the cooperation of Mr. Terry J. Owens, District Manager, Mr. Paul D. Shriver, State Administrator, and other officials of the Works Projects Administration, a great variety of work has been accomplished throughout the institution. The largest project consisted of new construction and of general repairs, both of which would have been impossible without the assistance of this organization. With one exception, all brick buildings at the North Unit, all new structures were of stone obtained from a quarry leased by the hospital. The stone was quarried by male patients and delivered to the various construction sites by hospital trucks. A list of the improvements and general repairs performed under this project with details as to cost will be found in Table No. 8 in the report of the Steward. Another major project was the canning of fruit and vegetables, which was conducted in cooperation with the Pueblo county commissioners. Thousands of gallons of canned goods were prepared and a marked savings was effected, details of which will be found in Table No. 8A in the report of the Steward. The third project consisted of: First, the standardization and kitchen testing of large quantity cooking recipes in the dietary department; and second, a reorganization of the clothing records of the patients for the nursing service. Both of these activities proved well worth while to the hospital and could not have been completed without the personnel furnished by the Works Projects Administration.

NATIONAL YOUTH ADMINISTRATION PROJECTS

Training courses for young people sponsored by the National Youth Administration were established in many departments of the hospital. The youths were placed under the supervision of experienced employees and taught the duties and responsibilities involved in certain positions. In some departments the courses had to be discontinued because young people adapted to the specific types of training could not be obtained. A total of 126 in-

dividuals received some form of instruction throughout the institution and 23 of these are still in training. These courses proved of great value both to the individual and to the hospital and the possibilities as to their future development are practically unlimited.

Another project which provided excellent training was the construction and installation of a central radio system. This replaced the then existing unit which had ceased to function efficiently. The necessary material was purchased by the hospital, while the labor needed to assemble and install it was furnished by 65 young men who were on the rolls of the National Youth Administration. The work was done under the direct supervision of Mr. Carl E. Drumeller, project supervisor, an experienced radio engineer. The installation was very satisfactory and the entire system is operating efficiently. Much credit must be given Mr. Drumeller and the other officials of the National Youth Administration for the successful completion of the project.

PASTEURIZATION PLANT

Under the supervision of Mr. M. M. Miller, Associate Milk Specialist for the United States Public Health Service, a modern pasteurization plant was installed at the dairy. This plant has a capacity of twelve hundred gallons of milk per day and is also equipped with a homogenizer. All milk for drinking is bottled, whereas that for cooking is put in ten gallon cans. The possibility now for an epidemic from a milk-borne infection is therefore practically eliminated.

PRESENT BUILDING PROGRAM

The old female center building has been demolished and a new dormitory housing two hundred patients is being erected on its site. Plans for another structure with a capacity of two hundred and twenty women are now in progress. This building will be for chronically disturbed patients and will have a cafeteria, a hydrotherapy unit, an occupational therapy department and an enclosed court for recreational purposes. Whether or not this latter structure will be erected will depend entirely upon construction costs at the time the bids are opened.

MAINTENANCE FOR PERSONNEL

Despite the recommendation made to the Thirty-second General Assembly relative to providing maintenance for employees, no action on this important subject was taken. As the new buildings were being occupied and the number of employees increased it became necessary to make some provision for those who could not be given housing accommodations at the hospital. Following numerous conferences with his excellency Governor Ralph L. Carr and Mr. James P. Noonan, State Budget and Efficiency Commissioner, it was decided to make an allowance of fifteen dollars

per month for room rent to a certain number of employees who lived off the hospital grounds. This procedure was put into operation on September 1, 1940, and three hundred employees were given the allotment, thus increasing the payroll by approximately forty-five hundred dollars for that and subsequent months. Careful analysis shows that it is more economical to permit employees to live outside of the institution than it is to provide housing accommodations for them. Also the numerous problems that arise with having a large personnel living under very crowded conditions are practically eliminated. Nearly 50 per cent of those receiving the allowance either have purchased or are buying homes in the community. As a result the morale of that portion of the personnel is high and many employees who formerly took no interest in community life are now taking their parts in civic affairs. It thus appears that the employee, the hospital and the community have all benefited from the procedure.

SPECIAL APPROPRIATIONS RECEIVED

Maintenance Fiscal Period 1939-1941, \$1,450,000. Due to the delay in occupying the new buildings it was possible to operate the institution during the fiscal period from July 1, 1939, to June 30, 1940, without a deficit.

Maintenance Fiscal Period 1941-1943, \$1,750,000. The amount requested for maintenance for the fiscal period from July 1, 1941, to June 30, 1943, was markedly reduced by the legislature. It does not appear at this time that the appropriation of \$1,750,000 will be sufficient to operate the institution without a deficit at the end of the biennium. The cost of all material is rising and because of increasing living expenses it will undoubtedly become necessary to revise upwards the salary schedule for the personnel. Likewise, it can be anticipated that as a result of the defense activities of the nation a marked increase will occur in the patient population of the hospital. Every effort will be made to keep the costs of operation within the limits of the appropriation, but at present this appears to be a most difficult if not an almost impossible task.

Fountain River Flood Control, \$37,000. This appropriation is being used to protect the property of the Colorado State Hospital located on the banks of the Fountain River. The existing dikes are being raised and reinforced with slag obtained from the Colorado Fuel and Iron Corporation through the cooperation of Mr. L. F. Quigg, vice-president in charge of operations.

Purchase of Water Rights, \$900. This appropriation was used to purchase fourteen additional shares of the West Pueblo Ditch and Reservoir Company stock so that now the Colorado State Hospital owns the controlling interest in the organization.

DIETARY DEPARTMENT

During the period just ended three important advances have been made in the dietary department. First, cafeteria food service has been made available to a greater number of patients so that now approximately twenty-two hundred are fed in this manner. Cafeterias have been installed at the Farm, in the isolation unit for ambulatory convalescents and in the five new dormitories housing patients who for various reasons must eat on the wards. It is planned to extend this type of food service wherever practical throughout the institution, as years of experience have proven that it is not only more economical but also more satisfactory to the individual patient. Second, a central cafeteria for employees has been established, thus eliminating seven separate makeshift dining rooms located in all parts of the grounds and now the entire personnel is fed at one place. Centralization has greatly reduced the problems incident to serving this group and at the same time has resulted in improving the quality of both the food and the service. Third, in accordance with the general policy of training employees throughout the various departments of the hospital, a course for apprentice cooks has been instituted. The applicants are carefully selected and are given instruction for a period of six months. The course includes theoretical and practical work in kitchen management, in the preparation of special diets, in large quantity cooking, in the use of modern kitchen equipment, and in the supervision of patients working in the unit. It is hoped by this means to eliminate the difficulty of obtaining trained personnel for institutional cooking.

THE 13th STREET REVIEW

For many years it had been thought that some sort of a periodical edited and published by the patients had a definite place in hospital life. In November, 1939, The 13th Street Review was founded as a twice a month publication and was distributed generally throughout the institution. Immediately it became popular among both the patients and the employees. Numerous changes have been made since the first issue and from July 2, 1940, it has consisted of a single sheet mimeographed on both sides and distributed daily except Sunday. Facts concerning institutional activities, the patients, the employees and any other material thought to be of general interest are published at the discretion of the editor. It is thus not only a source of information and entertainment to the entire hospital population but also it provides a valuable form of therapy for the patients who publish it.

DEPARTMENT OF PUBLIC WELFARE

Due to a lack of funds it has never been possible to establish a Social Service Department at the hospital. As a result, very little was known concerning patients admitted except those who had been in other mental hospitals. Social histories were pre-

tically non-existent and information vital to the proper study and treatment of the individual could not be obtained. Knowing that the Department of Public Welfare had a state-wide organization with representatives in each county, it was decided to appeal to the director for assistance in obtaining data about patients sent to the hospital. Mr. Earl M. Kouns, the Director of Public Welfare, cooperated immediately and designated Mr. C. W. Jackson, Director of Public Assistance, to work out a plan and method of procedure. This was done and a practical program has been established whereby much needed information concerning patients is now available to the hospital. With this program in operation the management of admissions, paroles and discharges has been simplified and the service to the individual patient has been improved.

HOME TOWN NEWSPAPERS

Realizing the value of keeping the patient in contact with his or her home community and appreciating the generosity of the press it was decided to appeal to the publishers of local newspapers throughout the state to donate copies of their publications to the hospital library. The response to the request was far beyond expectation and at present "home town" papers from forty-eight of the sixty-three counties in the state are being received. The readers are of two groups, that is, those who go to the library to read and those who receive the papers on their respective wards. To this latter group over sixteen hundred copies are distributed monthly. Every effort is made to have the individual patient read the "news" from his or her home community. This necessitates papers being sent from ward to ward, consequently many are practically worn out before they are returned to the library. Major complaints are registered only when patients do not receive their favorite newspapers or when certain portions of an issue are missing. It is difficult to evaluate from a psychiatric viewpoint the benefit derived by the individual from this procedure, but it can be stated that receiving "home town" news is good therapy. Much credit must therefore be given to the publishers in the state of Colorado for their generous cooperation in making this form of treatment available to the patients.

MEDICAL REPORT

With the ever-increasing patient population the case load for the members of the medical staff has become heavier and heavier, but nevertheless the standard of medical care has gradually been raised. In 1940 the Colorado State Hospital was accredited by the American College of Surgeons, and in 1941 it was approved for the training of residents in psychiatry by the American Medical Association. This recognition was very gratifying but it may prove very difficult to maintain because of adverse conditions now prevalent. Most critical of all immediate problems is that of keeping an adequate and well trained personnel. A shortage already exists and unfortunately this is most acute in the medical

and nursing departments. Qualified physicians are difficult to secure and it is impossible to fill the vacancies in the nursing service. No improvement can be anticipated within the near future because as the defense program expands the solution of the personnel problem will become more and more difficult. With this rather gloomy outlook it must be assumed that the standards for care and treatment will of necessity be lowered for at least the duration of the national emergency.

During the past thirty-one months the general health of both patients and employees has been good and no epidemics have occurred. With additional facilities for care and treatment provided by the building program better segregation has been possible and more therapeutic procedures have been available. The new hydrotherapy department with sixteen continuous tubs, eighteen pack tables and an hydriatic unit makes possible both sedative and stimulative hydrotherapeutic measures. The isolation unit provides a more satisfactory means of caring for contagious diseases and the enlargement of the department for tuberculous patients gives a greater opportunity to serve this group. The method of handling ambulatory patients having neuro-syphilis and receiving chemo-therapy has been modified and all such cases now are treated at a central clinic with the result that the individual receives more adequate therapy. "Shock" treatment by the use of insulin and metrazol has been continued. The results obtained have not been uniformly successful but the clinical improvement noted in many cases warrants the usage of both drugs. If, however, the problem of retaining a trained personnel is not solved the use of insulin will of necessity be discontinued.

HOSPITAL SURVEY

In July, 1940, Dr. Samuel W. Hamilton, Mental Hospital Advisor for the United States Public Health Service, made a survey of the Colorado state mental institutions. He spent several days at this hospital and visited all the departments. As a result of his inspection here he was able to offer many constructive suggestions relative to the various phases of institutional procedures.

CHANGES IN PERSONNEL

Appointments to the medical staff: Dr. Paul S. Wolfe, May 12, 1939; Dr. O. R. Holloway, December 5, 1938; Dr. Edward J. Delehanty, April 10, 1939; Dr. Thad P. Sears, August 1, 1940; Dr. Karl J. Waggener, April 1, 1940; Dr. Margaret Tilden, June 28, 1940; Dr. Richard D. Huff, July 5, 1940; Dr. Wendell T. Winkett, July 15, 1940; Wr. William M. Peake, August 19, 1940; and Dr. Viola V. Newby, September 2, 1940.

Resignations during the period: Dr. Paul S. Wolfe, June 23, 1940; Dr. F. Wm. Cutts, November 23, 1939; Dr. T. Gallup, July 25, 1939; Dr. Adele Kempker, December 25, 1939; Dr. Paul Haun, December 5, 1938; Dr. Wm. N. Baker, December 31, 1938; Dr. H. S. Knoch, June 14, 1940; Dr. O. R. Holloway, November 25, 1940; Dr. Edward J. Delehanty, October 29, 1940; Dr. Thad P. Sears, April 21, 1941; Dr. G. F. Ewing, January 29, 1940; and Dr. Viola V. Newby, February 16, 1941.

LEGISLATION RECOMMENDED

The following recommendations are again being made: First, that the statute governing payments for care and maintenance by relatives of indigent patients be clarified; second, that the various statutes relating to the "criminal insane" be revised and special legislation be enacted concerning the discharge of this group of patients when absent from the hospital either on parole or escape; and third, that definite legislation be enacted providing a fixed cash allowance for employees who do not receive maintenance at the hospital. It is further recommended that statutory provision be made for the acquisition of additional land near the Colorado State Hospital Farm and that the statute relating to the admission of voluntary patients be revised.

ACKNOWLEDGMENTS

To the officers and employees of the Colorado State Hospital, to the physicians and surgeons of the consulting staff, to the various state and federal officials and to his Excellency, Governor Ralph L. Carr, I wish to express my sincere thanks for the hearty cooperation and friendly assistance I received at all times in conducting the affairs of this institution.

F. H. ZIMMERMAN, M.D.,
Superintendent.

Dr. F. H. Zimmerman, Superintendent,
Colorado State Hospital.

Dear Sir:

I herewith present to you a report of the business department of this institution, covering the period beginning December 1, 1938 and ending June 30, 1941. In order to give a clearer financial picture, certain reports cover only the biennial period from July 1, 1939 to June 30, 1941.

Tables numbers 1 to 9, inclusive, relate to finances. Tables numbers 10 to 18, inclusive, cover the operation of various departments of the institution.

The per capita cost covering this period is higher than previous periods. This has been mainly caused by increased personnel necessitated by our building expansion program.

We are entering into a period of higher prices caused by unsettled world conditions and we must expect a greatly increased per capita cost for the next biennium.

Respectfully submitted,

CHARLES G. DOWLING, Steward,
Colorado State Hospital.

Table No. 8B**SHOWING COST OF RADIO AND CENTRAL PAGING
SYSTEM INSTALLED UNDER N. Y. A. PROJECT NO.
740-84-254 FROM DECEMBER 30, 1940 TO JUNE 30, 1941**

A Radio and Central Paging System constructed, assembled and installed as a National Youth Administration project. The master radio consists of one radio tuner with push-button tuning for eight stations, also short wave reception; six booster amplifiers of 50 watts each, total power of 300 watts utilizing sixty-five tubes; monitor panel to check input and output volume and quality; one pre-amplifier for paging microphone; one automatic record-changing record player capable of playing sixteen records consecutively; mixing panel for leveling volume of radio tuner; pre-amplifier, aud record player; 152 loud speakers, one for each ward, various kitchens and dining rooms, nurses' homes, etc.; with provisions for expansion to 192 loud speakers. Approximately 35,000 feet of wire was used to wire the connecting system.

All material for construction furnished by Colorado State Hospital. Labor furnished by National Youth Administration employing altogether sixty-five Pueblo youths, as many as thirty-five at one time.

Total cost of material furnished by Colorado State Hospital	\$2,498.79
